

Apps 365

SharePoint Document and Mail Merge

SharePoint Document Merge is the simple, fast and clean way to merge SharePoint list data into predefined Word, Excel and PowerPoint document templates without code. Also, merge multiple Word documents to a single document.

Define Word and/or Excel and/or PowerPoint templates, store them in document libraries or access them from a drive location, then easily merge those templates with data from SharePoint lists. Automatically generate and output the populated documents to a user specified SharePoint document library. Select multiple SharePoint list items or Bulk Merge an entire list. A document for each list row (based on your selected template) will be automatically created and stored with a customisable file name to be easily identified.

Merge any SharePoint list data into Word, Excel and PowerPoint Templates One Click automatic creation of Single or Multiple Merged

Generate contracts, personalised letters, legal documents, marketing materials, policies, quotes, invoices, financial or project reports, presentations and much more.

- ✓ Template based, for easy repeatability and consistency.
- ✓ Ensures data accuracy and data completeness.
- ✓ Speeds up document creation, instant productivity boost.
- ✓ Merge list data to a single document or multiple documents.
- ✓ Repeated rows for list-based output in Excel and Word tables.
- ✓ Simple template creation using Merge Fields or Placeholders.
- ✓ Tightly integrated into SharePoint, so that all security, workflows, content types, ribbons and menus work as you'd expect them to.
- ✓ Available for SharePoint 2010, 2013, 2106, 2019 and Online.
- ✓ Flexible licensing: Single User, Site, Collections, Farms, Enterprise.
- ✓ Easy to install, easy to use, no training required.
- ✓ Excellent UK based support.
- ✓ 5 Star Reviews.

Do you collect customer records, financial data, order information, or any other important business data in SharePoint lists?

With SharePoint Document Merge you can swiftly merge this data into Word and Excel document templates with absolutely no coding!

SharePoint ShortUrl

SharePoint ShortUrl is a SharePoint solution that allows the creation and use of vanity and shortcut hyperlinks, fully integrated within the SharePoint environment.

By default, SharePoint creates enormously long hyperlinks, which makes for ugly and error prone hyperlinks, for example, compare the following link to a folder in a document library:
<https://yoursite/clients/abc%20company/Shared%20Documents/Forms/AllItems.aspx?RootFolder=%2fclients%2fabcd%20company%2fShared%20Documents%2fClient%20Requirements&FolderCTID=&View=%7b80c76b49%2dFA92%2d490E%2dAFBF%2d8A07F9C73CCE%7d>

When you use SharePoint ShortUrl, it can also be shortened to just:

<https://yoursite/clients>

Vanity or Random URLs Custom
 Domain Names Links with
 Expiration Dates Statistics on Link
 Clicks Password Secured Links 301
 / 307 Redirect Types

The screenshot shows the 'SharePoint ShortUrl' application interface. It includes a header with the SharePoint logo and the text 'ShortUrlApp SharePoint ShortUrl'. Below the header is a form with the following fields:

- *ShortUrl Name: PartnerPack
- URL (Full URL to the destination link): http://www.apps365ltd.com/PartnerPortal/S
- ShortUrl Owner: paul@apps365ltd.onmicrosoft.com
- ShortUrl Expiry Date: 2019-12-31
- Password: [masked]
- Total Uses: 0 (0 = Unlimited)
- Redirect Type: 301(Moved Permanently)

At the bottom of the form are 'Save This ShortUrl' and 'Cancel' buttons.

Make life with SharePoint more pleasant by getting rid of ugly, long hyperlinks and instead create meaningful and memorable ones. Your users will thank you for it

- ✓ Available for SharePoint 2010, 2013, 2106, 2019 and Online.
- ✓ Flexible licensing: Site Collections, Farms, Enterprise.
- ✓ Easy to install, easy to use, no training required.
- ✓ Excellent UK based support.
- ✓ 5 Star Reviews.

Drastically reduce URL length
 Improves readability Easier to say, copy and recall Looks better in documents Analytics to track usage of links Supports QR Codes
 Shortcut to Documents, Lists, Sites, offsite resources and much more

SharePoint PDF Wizard

SharePoint PDF Wizard is the simple, fast and clean way for users to manipulate and convert PDF files into common file formats from within SharePoint.

SharePoint PDF Wizard is feature packed and allows you to automatically generate, manipulate and output PDF documents to a user specified SharePoint document library. You can also create Templates with Pre-set Configuration Settings to perform operations on specific SharePoint document library files on a single click and/or triggered by an Event (Workflow).

Convert most common document formats into PDF Combine different document types into a PDF Encrypt & Add Passwords Automate your PDFs Date expire the documents

Manipulate and convert PDF documents into common file formats from within SharePoint. Dispense with Adobe licences for PDF document creation and editing.

- ✓ Convert PDF files in Word, Excel, PowerPoint, HTML without coding.
- ✓ Save multiple Word, Excel, PowerPoint, HTML, Image files as one PDF.
- ✓ One Click and Automatic creation of PDF Documents.
- ✓ Fully integrates with Workflow events and document security.
- ✓ Digitally sign the PDF and include a signature graphic too.
- ✓ Set expiry dates for documents and optionally add passwords.

- ✓ Available for SharePoint 2013, 2016, 2019 and Online.
- ✓ Flexible licensing: Single User, Site, Collections, Farms, Enterprise.
- ✓ Easy to install, easy to use, no training required.
- ✓ Excellent UK based support.
- ✓ 5 Star Reviews.

Do you create a lot of PDFs? This app enriches the functionality and security of the PDFs, whilst allowing automated document creation based on templates. Perfect for Legal Teams and Customer Service, where formal documents need to be created, accurate and secured.

SharePoint Image Maps

SharePoint Image Maps allows users to create interactive images with eye-catching content from within SharePoint. An image map is one image with multiple “clickable” hotspots, to create beautiful navigational signposts.

An image like the one below with clickable regions, can replace the need for custom page layout design and several text links or buttons on a SharePoint page, reduce the volume of text and offers users a more intuitive interface. In this age of visual culture, users spend more time on the images than they do reading and acting on text. Images enhanced with SharePoint image maps make the most of every chance to communicate your message and boost engagement.

Give your users easier, fun and more intuitive ways to work. Image Maps drive user engagement and align with modern web design ideas.

Create incredibly attractive pages and user interfaces with image maps, which are a single image with multiple “clickable” hotspots; link to pages, sites, images, videos....

- ✓ Advanced Drag & Drop Editor.
- ✓ Responsive design optimised for touch screen devices.
- ✓ Tooltip content & links stored in SharePoint Lists are Dynamic.
- ✓ Polygon, Icon, Rectangle and Ellipse shapes available at any size.
- ✓ Multiple layers, zoom controls and an easy to use interface.
- ✓ 150 High Resolution, SVG Icons included.
- ✓ Save Image Maps with Images as a set, for later editing
- ✓ Available for SharePoint 2013, 2016, 2019 and Online.
- ✓ Flexible licensing: Single User, Site, Collections, Farms, Enterprise.
- ✓ Easy to install, easy to use, no training required.
- ✓ Excellent UK based support.
- ✓ 5 Star Reviews.

With our easy to use, drag and drop editor you can quickly create, edit and generate image maps for any image without coding. Simply define selected areas of your image, set actions and display content for when you roll over these areas. Then insert your Image Maps into any SharePoint Page!

SharePoint Image Editor

SharePoint Image Editor provides a simple and powerful way to edit and enhance any image from within SharePoint. Have full control over your image including; layers, crop, resize, filters, frames, text, shapes and effects.

With the easy to use, yet advanced, Image Editor you can quickly customise, edit and save Images directly within SharePoint. Any Images contained within a SharePoint library will have the option to edit the image from the image's Context Menu "Image Editor".

Create professional looking business graphics in seconds, so there's no need for dedicated and expensive image editing applications. Combine with Image Maps for maximum effect.

A perfect solution for occasional image editing and office illustrations. No external software is required, users do all editing directly in SharePoint.

Powerful, yet simple! Have full control over your images including; layers, crop, resize, filters, frames, text, shapes, effects and history.

- ✓ Advanced, easy to use image editor.
- ✓ Resize, crop, transform, rotate, flip, invert, skew.
- ✓ Add shapes, stickers, emojis, text, arrows, stars, polygons.
- ✓ Draw with different brushes any width, any colour.
- ✓ Photo filters, rounded corners, frames and more.
- ✓ Zoom controls, undo and redo, version history, layers.
- ✓ Upload, download or work with images directly from libraries.
- ✓ Available for SharePoint 2013, 2016, 2019 and Online.
- ✓ Flexible licensing: Single User, Site, Collections, Farms, Enterprise.
- ✓ Easy to install, easy to use, no training required.
- ✓ Excellent UK based support.
- ✓ 5 Star Reviews.

Image Editor is beyond easy to use, even for complete novices. All users will be able to create great looking office graphics in minutes. It's the tool SharePoint should have had built in from day one. Simple, Fast, Brilliant.

SharePoint Page Guide

SharePoint Page Guide is the simple, fast and most effective way to incorporate interactive help within your SharePoint pages by way of step-by-step walk-through for selected page elements.

SharePoint Page Guide helps SharePoint users to learn and understand the platform and applications built on top of SharePoint interactively, with live contextual help. One of the major benefits of using these step-by-step walk-throughs is a dramatic decrease in the number of support calls and tickets with requests for help relating to the application to which it is available

Highlight multiple targets at the same time Auto Start of first view
Responsive and works with dynamic content Map of all tour steps available for easy stepping forwards and backwards

Create professional looking, interactive help guides and walkthroughs for your SharePoint sites and applications, with live contextual help.

- ✓ Create and Intro in the centre of the browser window.
- ✓ Works with Classic and Modern UI SharePoint Sites.
- ✓ Highlight multiple page elements and describe them as a group.
- ✓ Responsive, works with all modern browsers.
- ✓ Ability to stop and start the Page Guide.
- ✓ 37 Positions, Styling, Themes, Colour and Transparency controls.
- ✓ Page Guide works across multiple pages for complex sites.

Autopilot option, with automatic step through and progress bar

- ✓ Available for SharePoint 2013, 2016, 2019 and Online.
- ✓ Flexible licensing: Single User, Site, Collections, Farms, Enterprise.
- ✓ Easy to install, easy to use, no training required.
- ✓ Excellent UK based support.

Dramatically reduce the number of support calls for SharePoint by creating easy to follow, interactive user guides for all SharePoint Sites and Applications. Ideal for when launching new Applications or Intranet areas. Reduces the need for training on SharePoint content.

SharePoint Content Slider

The SharePoint Content Slider will help you to showcase your work in an impressive creative way. The Content Slider is added to a designated space on your site and enables your visitors to flip through slides to consume various pieces of content at their own pace.

With our easy to use, advanced Content Slider Builder you can quickly customise, edit and generate Content Sliders to surface the dynamic content of any SharePoint list without coding. Simply choose your List, define the selected fields to display, live preview and save.

The generated Content Slider is fully responsive, optimised to work across all devices.

Tell a story or provide a sequential narrative that is compelling to click through and follow. Display a creative portfolio in a manner that's concise, yet still eye-catching.

Create captivating slides with the dynamic content surfaced from your SharePoint lists.

- ✓ Promote new content, easily and effectively.
- ✓ Consolidate Videos and Images into a single presentation.
- ✓ Dynamic content from SharePoint Lists, supports filters.
- ✓ Edit sliders and republish with ease.
- ✓ Insert the Content Slider as a Web Part to any SharePoint location.
- ✓ Easy to Use, Builder interface to create eye catching presentations.
- ✓ Scroll effects, multiple navigation controls and colour schemes.
- ✓ Supports Social Media links and counters (Likes, Comments)
- ✓ Available for SharePoint 2013, 2016, 2019 and Online.
- ✓ Flexible licensing: Single User, Site, Collections, Farms, Enterprise.
- ✓ Easy to install, easy to use, no training required.
- ✓ Excellent UK based support.

Provide a highlight reel about what's happening with your company right now. Consolidate videos into a single space, so visitors know where to go to watch your collection of stories and tutorials. Advertise the newest products, promotions, or news on the home page.

SharePoint Timeline

The SharePoint Timeline gives you a completely new view on historic events, based on either list data or list/document metadata. At a glance viewing of the timelines gives a chronological appreciation that can't be conveyed with simple text dates.

Creating vertical timeline infographics is normally a time-consuming task, often left to the communications and design departments or even developers. With the SharePoint Timeline app, they can be generated on demand, based on data in SharePoint Lists or based on what has already happened, in Calendars, in Document Libraries and Lists.

Automatically build a timeline from a SharePoint List, using Text, Images, and even Videos. Used as a Version History viewer, it gives a far clearer view of events & changes.

Create beautiful vertical timeline infographics to easily convey any chronological information. News, Version History, Event Sequences, Results and more.

- ✓ Includes News items directly from a SharePoint List.
- ✓ Use a Calendar as a source of information.
- ✓ Use Document Version History as a source of information.
- ✓ Automatically format Images or Videos into the Timeline graphic.
- ✓ Over 20 Styles to choose from, more added regularly.
- ✓ Customisable styles, colours, fonts, sizes to suit the site branding.
- ✓ Dynamic data from lists means the Timeline is always up to date.
- ✓ Exportable as a graphic file for use in other locations.
- ✓ Available for SharePoint 2013, 2016, 2019 and Online.
- ✓ Flexible licensing: Single User, Site, Collections, Farms, Enterprise.
- ✓ Easy to install, easy to use, no training required.
- ✓ Excellent UK based support.

Create visually appealing date-based Infographics. Vertical Timeline with images, text, videos. Several fully customisable built-in styles to choose. Ideal for auditing, reporting and presentations. Fully dynamic, live data, direct from SharePoint Lists
